

PRIVACY PODS

Flexible Personal Space for Group Living Environments

Designed to create instant personal space within shared rooms, our **Privacy Pods** offer residents dignity, calm, and visual separation without permanent walls or construction.

Built with a lightweight yet sturdy black aluminum frame, Privacy Pods are easy to assemble, move, and reconfigure as needs change. Their clean, modern design blends seamlessly into treatment facilities, recovery settings, senior living, and transitional housing—providing structure without feeling institutional.

Available in single, double, and corner configurations, Privacy Pods allow facilities to customize layouts for shared bedrooms, intake areas, quiet zones, or overflow spaces. Optional window panels maintain a sense of openness and safety, while tackable fabric surfaces support personalization, schedules, or therapeutic displays.

Why Privacy Pods Work in Group Living

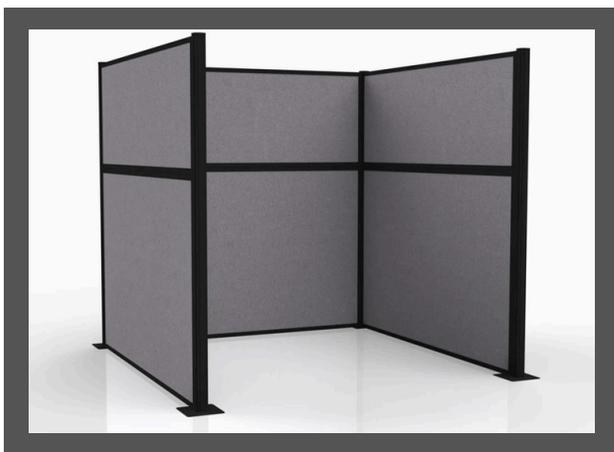

- Create defined personal space in shared environments
- Support privacy, focus, and emotional comfort
- Adapt easily to changing room layouts
- Provide structure without permanent construction
